

## Glazing Charges in Packages.

There is a new feature that allows glazing charges to be excluded from packages. If this is set then glazing is not included in the discount calculation for the package. The current process is that the charge for the frame, lenses and glazing are added and then a discount is applied to the this total to bring the price to be paid down to the package price agreed. With this setting then the discount is applied to the frame and lenses only so a lower discount is applied. However, it is shown below that special pricing for the glazing can still be applied.

### Configuration.

There is a setting to turn this feature on. It is under Pricing / Packages/ Customer / Glazing Charge.

There are two settings.

Configured to turn this feature on.

Price list for the glazing charge. This is the price list to be used to apply for the glazing charge as bespoke pricing may be offered.

So that existing packages will continue to operate as now then there is a setting to turn this on for a package.

There are 2 new items; Add Glazing and Glaze Pricelist.

Currency	GBP	<a href="#">Package Restrictions</a>
Lens Pricelist		<input checked="" type="checkbox"/> Add Glazing
Postage	FOC	Glaze Pricelist 5289

If Glaze Pricelist is not set then the default pricelist as specified in settings will be used. In this way, a bespoke price list for glazing for this package can be set.

It is also possible to set a customer to use a particular pricelist so if there is an agreement that glazing across all packages for a customer then this can be set in the customer record using the complete pricing.
